

我的猫 My Cat

我回我的家乡，土桑市，的时候，我看我的家人和我的猫。我猫的名字是Winslow,可是，我跟我的家人都叫它Winnie。八年前，我妈妈散步的时候，Winnie跟着我的妈妈回我们的家。我们觉得我的爸爸对猫过敏，可是他没有过敏性，所以Winnie成我们的宠物。

Winnie
是很可爱的猫。它的眼睛好像有很多颜色的。有时好像绿色的，有时好像灰色的，也有时好像黄色的。

Winnie比较野性。它喜欢从家里出去，跟别的猫玩，猎取鸟，鼠，和蜥蜴。有时，Winnie带鸟或者鼠回来我家的前廊。它有时跟别的猫战斗，特别是一只黑色的猫。Winnie也常常睡觉。它很友好,喜欢跟我们在一起。

我的爸爸妈妈去圣地亚哥市的时候，有一天Winnie回家，它的脚受伤了。我们觉得蛇咬伤Winnie,或者是那只黑色的猫伤害它。我们带它去看兽医。Winnie得用石膏绷带。它真不喜欢。可是，现在它很健康。我们都爱我们的猫。

When I go back to my home in Tucson, I will see my family and my cat. My cat's name is Winslow, but my family and I all call him Winnie. Eight years ago, when my mom was on a walk, Winnie followed her home. We thought my dad was allergic to cats, but he didn't have a reaction, so Winnie became our pet.

Winnie is a very cute cat. His eyes seem to be several different colors. Sometimes they seem green, sometimes they seem gray, and sometimes they seem yellow.

Winnie is wild, comparatively. He loves to go outside, see other cats, and hunt birds, mice, and lizards. Sometimes, Winnie brings birds or mice to our front porch. He sometimes fights with other cats, especially a certain black cat. Winnie also sleeps very often. He is very friendly, and likes to follow us around.

When my mom and dad went to San Diego, Winnie came home one day with a wounded leg. We thought that a snake bit him, or else that he was wounded by the black cat. We took Winnie to the vet. He had to use a cast. He really didn't like it. However, he is healthy now. We all love our cat.

Vocabulary

家乡—jia1xiang1 hometown
跟着—gen1zhe to follow
过敏—guo4min3 allergy
过敏性—guo4min3xing4 allergic reaction
成—cheng2 to become
野性—ye3xing4 wild, undomesticated
